REMARKS

Applicants kindly thank Examiner Chan for his helpful guidance and suggestions regarding this application during various conferences on March 6 and 7, 2006. During the conversation the claims and current rejections were discussed. Applicants have amended the independent claim 49 as shown in order to put the case in condition for allowance. Various dependent claims have also been amended to overcome other rejections, informalities and to further focus these claims on various features.

On page 2 of the Office Action the Examiner rejected various claims due to informalities. Applicants have amended the claims as shown and believe that they are now in good form.

In paragraphs 5 and 6 of the Office Action the Examiner rejected various claims as being unpatentable over various combinations of Fields (U.S. 4,440,724) in view of Baloga et al. Applicants respectfully direct the Examiner's attention to Applicants' prior issued parent patents, at least one of which includes a similar enhancing step.

For all the foregoing reasons, Applicants believe that these dependent claims are not obvious in view of the references, when viewed alone or in combination, and should be allowed.

If the Examiner feels that this amendment does not place the case in condition for allowance, then Applicants respectfully request an interview with the Examiner prior to the issuance of any further Office Action.

Applicant is filing concurrently under separate cover a request for a one month extension of time.
